

Flexible and weather-resistant cable protection for wind turbines

For further information, please visit www.fipsystems.com

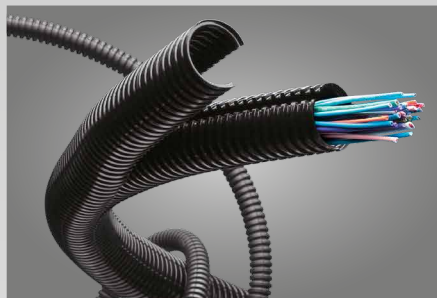

Extreme conditions such as wind, saltwater and UV radiation, but also abrasion and mechanical loads can have a massive negative impact on wires and cables of both offshore and onshore wind turbines. High-quality FIPSYSTEMS cable protection products by FRÄNKISCHE Industrial Pipes provide a solution for indoor and outdoor applications and help to extend the service life of cables.

FIPLOCK

Corrugated conduit systems for cable protection in different versions

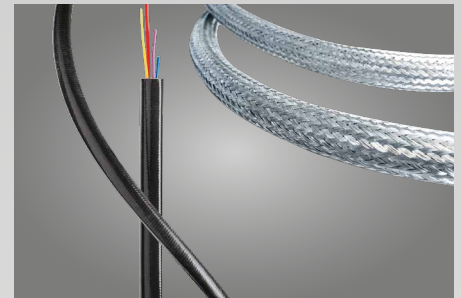

- flexible
- UV-resistant
- durable
- abrasion- and saltwater-resistant
- resistant to corrosion
- high fire protection requirements
- applicable accessories

FIPSPLIT

Two-piece corrugated conduit systems for servicing or retrofit installation

- flexible
- UV-resistant
- resealable
- two-piece, applicable accessories

FIPJACK

Wide range of textile protective hoses

- flexible
- electromagnetically compatible
- electrically insulating
- flame-retardant
